

COURSE OUTLINE

(1) GENERAL

SCHOOL	PHILOSOPHY		
ACADEMIC UNIT	PHILOLOGY		
LEVEL OF STUDIES	Undergraduate		
COURSE CODE	GLOF205	SEMESTER	3-83
COURSE TITLE	Mathematical Methods for Linguistics		
INDEPENDENT TEACHING ACTIVITIES <i>if credits are awarded for separate components of the course, e.g. lectures, laboratory exercises, etc. If the credits are awarded for the whole of the course, give the weekly teaching hours and the total credits</i>	WEEKLY TEACHING HOURS	CREDITS	
	3	5	
<i>Add rows if necessary. The organisation of teaching and the teaching methods used are described in detail at (d).</i>			
COURSE TYPE <i>general background, special background, specialised general knowledge, skills development</i>	SCIENTIFIC AREA OF SPECIALIZATION		
PREREQUISITE COURSES:	GLOF100		
LANGUAGE OF INSTRUCTION and EXAMINATIONS:	Greek		
IS THE COURSE OFFERED TO ERASMUS STUDENTS	Yes (in Greek)		
COURSE WEBSITE (URL)	https://elearn.uoc.gr/		

(2) LEARNING OUTCOMES

<p>Learning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i>

The main course objective is to introduce students with elementary mathematical methods/tools widely used in various fields of Linguistics. The course will have both a theoretical (introducing the mathematical concepts and formal models), as well as a practical component (real-world applications on linguistic examples). Specifically, upon completion of the course, students should:

- 1) Have familiarity with a number of methods and tools from mathematics. These include the basics of Set Theory, Mathematical Logic, Elementary statistics and Probability Theory and basic Calculus.
- 2) Be able to solve simple Linguistics problems using these methods.
- 3) Have the basic formal/mathematical knowledge required in a number of Linguistics fields (Theoretical Syntax and Semantics, Psycholinguistics, Computational Linguistics, Sociolinguistics, among others)

General Competences

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>
<i>Decision-making</i>	<i>Respect for the natural environment</i>
<i>Working independently</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology
Working independently
Working in an international environment
Decision-making
Production of free, creative and inductive thinking
Working in an interdisciplinary environment
Team work

(3) SYLLABUS

The course has both a theoretical and a practical part. In the theoretical part, the basic

mathematical methods used in various fields of Linguistics are introduced, while in the practical part, the students will be shown how these methods are used in solving or implementing solutions for various issues in a number of Linguistics fields.

(4) TEACHING and LEARNING METHODS - EVALUATION

<p>DELIVERY <i>Face-to-face, Distance learning, etc.</i></p>	<p>Face-to-face</p>																					
<p>USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY <i>Use of ICT in teaching, laboratory education, communication with students</i></p>	<ul style="list-style-type: none"> • Class lectures, presentations, slides (pdf) • Class notes, announcements & communication via ClassWeb • Communication via email 																					
<p>TEACHING METHODS <i>The manner and methods of teaching are described in detail.</i> <i>Lectures, seminars, laboratory practice, fieldwork, study and analysis of bibliography, tutorials, placements, clinical practice, art workshop, interactive teaching, educational visits, project, essay writing, artistic creativity, etc.</i></p> <p><i>The student's study hours for each learning activity are given as well as the hours of non-directed study according to the principles of the ECTS</i></p>	<table border="1"> <thead> <tr> <th data-bbox="630 995 954 1024">Activity</th> <th data-bbox="963 995 1282 1024">Semester workload</th> </tr> </thead> <tbody> <tr> <td data-bbox="630 1031 954 1060">Lectures</td> <td data-bbox="963 1031 1282 1060">39</td> </tr> <tr> <td data-bbox="630 1066 954 1121">Independent study and exam preparation</td> <td data-bbox="963 1066 1282 1121">83</td> </tr> <tr> <td data-bbox="630 1127 954 1157">Final written exam</td> <td data-bbox="963 1127 1282 1157">3</td> </tr> <tr> <td data-bbox="630 1163 954 1192"></td> <td data-bbox="963 1163 1282 1192"></td> </tr> <tr> <td data-bbox="630 1199 954 1228"></td> <td data-bbox="963 1199 1282 1228"></td> </tr> <tr> <td data-bbox="630 1234 954 1264"></td> <td data-bbox="963 1234 1282 1264"></td> </tr> <tr> <td data-bbox="630 1270 954 1299"></td> <td data-bbox="963 1270 1282 1299"></td> </tr> <tr> <td data-bbox="630 1306 954 1335"></td> <td data-bbox="963 1306 1282 1335"></td> </tr> <tr> <td data-bbox="630 1341 954 1371">Course total</td> <td data-bbox="963 1341 1282 1371">125</td> </tr> </tbody> </table>		Activity	Semester workload	Lectures	39	Independent study and exam preparation	83	Final written exam	3											Course total	125
Activity	Semester workload																					
Lectures	39																					
Independent study and exam preparation	83																					
Final written exam	3																					
Course total	125																					
<p>STUDENT PERFORMANCE EVALUATION <i>Description of the evaluation procedure</i></p> <p><i>Language of evaluation, methods of evaluation, summative or conclusive, multiple choice questionnaires, short-answer questions, open-ended questions, problem solving, written work, essay/report, oral examination, public presentation, laboratory work,</i></p>	<p>Three hour long written exam in Greek</p>																					

clinical examination of patient, art interpretation, other

Specifically-defined evaluation criteria are given, and if and where they are accessible to students.
